Dear Small Municipal Provider:

This is an OFFICIAL NOTICE that the Director of the Arizona Department of Water Resources (Director) has issued a Final Order adopting the management plan for the Tucson Active Management Area (TAMA) for the fourth management period, (4MP). This is also an Official Notice of the conservation requirements, distribution system requirements, and monitoring and reporting requirements established in the 4MP for small municipal providers, which will become effective on January 1, 2019. **PLEASE CAREFULLY REVIEW THIS NOTICE AND THE ENCLOSED REQUIREMENTS.**

On July 27, 2016, the Director issued a Final Order adopting the 4MP. The 4MP was adopted in accordance with Arizona's Groundwater Code (Code), which requires the Director to establish a continuing mandatory conservation program for all persons withdrawing, distributing or using groundwater within the AMA. For small municipal providers, the Code requires the Director to establish reasonable conservation requirements. The Code also requires the Director to establish conservation measures as may be appropriate for individual users and economically reasonable conservation requirements for the distribution of groundwater by cities, towns, private water companies and irrigation districts within their service areas.

As required by the Code, the 4MP contains reasonable conservation requirements for small municipal providers (4MP, section 5-708). The 4MP also contains individual user conservation requirements for municipal providers and individual users (4MP, section 5-709), conservation requirements for municipal distribution systems (4MP, section 5-710), monitoring and reporting requirements for municipal providers and individual users (4MP, section 5-711), and remediated groundwater accounting for conservation requirements (4MP, section 5-712). The aforementioned sections are enclosed herein as Attachment B1 which is incorporated into this notice by reference.

As a municipal provider serving 250 acre-feet or less of water for non-irrigation use during a calendar year, you are a small municipal provider. Beginning on January 1, 2019, and continuing

56-000354.0000

until the first compliance date for any substitute requirements in the Fifth Management Plan, you shall comply with the conservation requirements for small municipal providers in section 5-708 of the 4MP, the individual user requirements in section 5-709 of the 4MP, the distribution system conservation requirements for small municipal providers in section 5-710 of the 4MP and the applicable monitoring and reporting requirements in section 5-711 of the 4MP.

You should be aware that if you begin serving more than 250 acre-feet of water per year for non-irrigation use during the fourth management period, you will become a large municipal provider. In that event, you will be required to comply with the conservation requirements for new large municipal providers in section 5-707 of the 4MP and the distribution system requirements for large municipal providers pursuant to section 5-710(1) of the 4MP.

You have the right to seek administrative relief from the conservation requirements established in the 4MP. You also have the right to seek judicial review of the Director's Order adopting the 4MP. The following is a description of your rights.

Administrative Relief

The Director has found the conservation requirements in the 4MP to be equitable for most water users. However, there are two separate methods for seeking administrative relief from the conservation requirements if you believe you will be unable to comply with the requirements. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

A person who requires additional time to comply with a new conservation requirement or distribution system requirement may apply to the director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The director may grant a variance for up to five years upon a showing of "compelling economic circumstances" that will prevent the person from complying with the requirement. An application for a variance must be filed within 90 days after the date you receive this notice.

2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement or distribution system requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575. An application for administrative review under A.R.S. § 45-575 must be filed within 90 days after the date you receive this notice.

An administrative review may also be applied for at any time during the fourth management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement. If these circumstances should arise during the fourth management period, please contact Chanel Fitch-Kirkpatrick at 602-771-8585 for information and application procedures.

Judicial Review

In addition to seeking administrative relief through a request for variance or administrative review, you may seek judicial review of the Director's Order adopting the 4MP pursuant to A.R.S. § 45-114(C). Any action for judicial review must be filed within 35 days after your receipt of this notice.

You may review the entire 4MP at the locations listed in Attachment E, enclosed herein. If you have any questions regarding your conservation requirements or if you need an application form and information on the Variance or Administrative Review procedures, please call Chanel Fitch-Kirkpatrick at 602-771-8585.

Sincerely,

A handwritten signature in black ink, appearing to read 'Clint Chandler', with a stylized, cursive script.

Dear Provider:

Pursuant to Arizona Revised Statutes (A.R.S.) § 45-498 of the Groundwater Code, each city, town, private water company, and irrigation district within an AMA must maintain a current map delineating its service area and distribution system with the Arizona Department of Water Resources. On the reverse side of this letter is a form to indicate whether your service area boundaries or distribution system have changed since January 1, 2009.

Please submit the completed form, along with map copies if applicable, to the Tucson AMA office by March 31, 2010. If you have any questions, please contact the Tucson AMA office at 520-770-3800.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Tannler".

ARIZONA DEPARTMENT OF WATER RESOURCES

2009 SERVICE AREA MAP UPDATE

Provider Name: EVERGREEN AIR CENTER

Provider Number: 56-000354.0000

According to A.R.S. § 45-498 of the Arizona Groundwater Code, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 2009 please indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 2009, please indicate this below and submit two copies of your revised service area map to the Tucson AMA office no later than March 31, 2010. You may submit the maps along with your 2009 Annual Water Withdrawal and Use Report if you wish. A duplicate copy of the service area map submitted to the Department shall be kept on file at your offices.

Maps must be drawn at a scale of 1:31,680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and existing water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The changes to your operating distribution system made between January 1, 2009 and December 31, 2009 highlighted in a "contrasting" color.
4. Changes to the service area boundary since January 1, 2009 must be shown as accurately as possible in a "contrasting" color. "Service area" denotes the area of land actually being served water.
5. Townships, ranges and sections must be included within the exterior boundaries of the service area.
6. A map legend, scale bar, north arrow, and date.
7. Each map must be signed and dated by an authorized representative.

___ Service area boundaries and operating distribution system have not changed since January 1, 2009.

___ Service area boundaries or operating distribution system have changed since January 1, 2009.
(Two copies of the revised map must be submitted with your annual report)

Name (please print)

Title

Signature/Date

Phone

e-mail address

PLEASE SUBMIT ALL MAP REVISIONS BY MARCH 31, 2010

Electronically submitted files must be .PDFs, ArcGIS shapefiles, or geodatabase files. Electronic data may be submitted on a CD or emailed to the Tucson AMA office to Jeff Tannler at jmtannler@azwater.gov. CDs should be labeled with the Provider name and Right Number associated with the Service Area.

Dear Tucson AMA Municipal Provider:

This is an OFFICIAL NOTICE of modifications to your conservation requirements for the Third Management Period, 2000 – 2010. It is important that you review and understand this notice.

I. Modification of the Third Management Plan

The Director of Water Resources ("Director") has adopted modifications to the conservation requirements established for municipal water providers in the management plan for the Tucson Active Management Area for the Third Management Period ("Third Management Plan"). The modifications were made pursuant to the public hearing and comment provisions of A.R.S. § 45-572. The purpose of this notice is to inform you of the modifications.

The modifications to the conservation requirements for municipal providers fall into two broad categories. First, the non-per capita conservation program for large municipal providers was modified to allow for increased flexibility in the use of substitute reasonable conservation measures and to make corrections and technical changes. Second, the individual user requirements for municipal providers and individual users were modified to conform to recent legislation regarding responsibility for compliance with the requirements and to change the provisions allowing waivers from the right-of-way landscaping regulations.

II. Summary of Modifications

The following is a brief description of the modifications to the conservation requirements for large municipal providers, grouped according to the three categories described in the preceding section. References are to the paragraphs in the enclosed attachments where the official language of the modification is found.

A. Non-Per Capita Conservation Program

1. The "Landscape Retrofit Program For Existing Residential Customers" reasonable conservation measure (RCM) was removed from the Residential Interior category of the Substitute Reasonable Conservation Measure list and

added to the Residential Exterior category of the Substitute Reasonable Conservation Measure list.

2. The "Distribution Of Conservation Information To All New Non-Residential Customers And Submittal Of Water Use Plan By New Large Facilities" RCM has been modified by removing references to new large produce processing facilities as an individual user.
3. The "Exterior Audit Program For Existing Non-Residential Customers" RCM has been modified by labeling it as a Non-Residential Exterior RCM, and not a Non-Residential Interior RCM.
4. The "Water Audit And Fixture Retrofit Program For Existing Residential Customers" RCM has been modified to clarify that only those audits or retrofits that are verified by the water provider as having been successfully completed will count towards the required number of audits or retrofits. Additional language has been added to require a follow up survey of a statistically significant sample of audited customers to determine if they have implemented any changes in interior water use habits. The "Audit Program For Existing Residential Customers" RCM was similarly modified to clarify that only those audits that are verified as having been successfully completed will count towards the number of audits required by the RCM.
5. The "Landscape Ordinance Or Condition Of New Service for New Facilities" RCM has been modified to exclude all schools, parks, cemeteries, common areas of housing developments and public recreational facilities from the provisions of this RCM.
6. Section 5-104 of the Third Management Plan was modified to allow a provider regulated under the program to replace a standard RCM in a water use category with a substitute RCM in a different water use category if the director determines that the substitute RCM will result in a water use efficiency that is greater than the efficiency that would result from implementation of the standard RCM and that the substitution will not result in the provider implementing no RCMs in the water use category in which the standard RCM is contained. Previously, the program only allowed for the substitution of a standard RCM with a substitute RCM in the same water use category or a system related substitute RCM.

B. Individual User Requirements

1. Section 5-111 of the Third Management Plan have was modified to conform with Laws 2002, Ch. 133, § 2, which amended A.R.S. § 45-571.02 and allows the Director of Water Resources to give notice of an individual user requirement to an existing individual user more than thirty days after the management plan was adopted. If a notice is given more than thirty days following the adoption of the management plan, the individual user shall comply with the requirement by January 1 of the calendar year following the first full year after the date of the notice, and the municipal water provider shall continue to be responsible for

complying with the requirement until the first date on which the individual user is required to comply with the requirement.

2. Section 5-111 of the Third Management Plan was modified to clarify that acceptable reasons for granting a waiver for the purpose of serving groundwater to plants in publicly-owned right-of ways that are not listed on the Low Water Use /Drought Tolerant Plant List are for cases involving low-light conditions and elevation which lead to the inability to grow low water use plants. The previous provision allowing for the possibility of a waiver concerning service to water features in publicly-owned right of ways was removed.

III. Effective Date of Modified Conservation Requirements

The modifications described in Section II became effective on May 19, 2003.

The official language of the modifications to the individual user requirements is set forth in the enclosed documents. The official language of the modifications to the Non-Per Capita Conservation Program may be reviewed at the Department's website, www.water.az.gov.

If you have any questions regarding this notice please call the Tucson AMA office at (520) 770-3800.

Sincerely,

s/Herbert R Guenther

ARIZONA DEPARTMENT OF WATER RESOURCES
2002 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000354.0000
PROVIDER NAME: EVERGREEN AIR CENTER
CONTACT PERSON: Mike Michels
PHONE NUMBER: (520)-682-4181 #5518

Pursuant to Section 5-113 of the Third Management Plan (TMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information.
Please contact the Tucson AMA at 770-3800 if assistance is needed.

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered (*both metered and unmetered*) to each of the following user groups for calendar year 2002.

a. Residential - include all uses of water related to service of residences (*housing units*) including both interior and exterior water use. This should include deliveries to individually metered single family residences, multi-family housing complexes that are on master meters and group quarters (see page two for definition).

Metered _____ acre-feet

Unmetered _____ acre-feet

Total _____ acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities (*item d below*). **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered _____ acre-feet

Unmetered 174.1 acre-feet

Total _____ acre-feet

c. Total deliveries (*add amounts in a and b above*)

174.1 acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use (*item b above*). Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 2002.

_____ acre-feet

e. Total effluent deliveries (*not included in GPCD or lost water calculations*)

_____ acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

One acre foot = 325,851 x 100 gal water conversion ÷ by 325,851

2002 Schedule F-1, Page 2

Right #: 56-000354.0000

Provider Name: EVERGREEN AIR CENTER

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used (from Part V of the Annual Report Summary Page): 174.1 acre-feet

b) Total metered and unmetered (estimated) deliveries (Part 1c above): 174.1 acre-feet

c) Lost and unaccounted for water (subtract Part 2b from 2a above): 0 acre-feet

d) Percent of lost and unaccounted for water:

 AF) AF x 100 = Percent
lost and unaccounted total used
for water (Part 2c) (Part 2a)

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) A Single family housing unit means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units (not service connections) in your service area between July 1, 2000 and July 1, 2002:

 units

b) A Multifamily housing unit means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units (not service connections) in your service area between July 1, 2000 and July 1, 2002:

 units

c) Group quarters means living quarters occupied by one or more people under care or custody, such as orphanages, nursing homes and prisons, or quarters such as college dormitories, fraternity or sorority houses, nurses dormitories, rooming houses, hotels with permanent residents and congregate housing for the elderly.

Indicate net change in group quarters in your service area between July 1, 2001 and July 1, 2002:

 units

ARIZONA DEPARTMENT OF WATER RESOURCES
2000 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000354.0000
PROVIDER NAME: EVERGREEN AIR CENTER
CONTACT PERSON: Robert Melendez
PHONE NUMBER: 682-4181 - EXT 5852

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. Please contact the Tucson AMA at 770-3800 if assistance is needed.

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered (*both metered and unmetered*) to each of the following user groups for calendar year 2000.

a. Residential - include all uses of water related to service of residences (*housing units*) including both interior and exterior water use. This should include deliveries to multi-family housing complexes that are on master meters and deliveries to individually metered single family residences.

Metered 0 acre-feet
Unmetered 0 acre-feet

Total 0 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities (*item d below*). Do not include effluent or deliveries to irrigation rights or other service area rights.

Metered 0 acre-feet
Unmetered 0 acre-feet

Total 0 acre-feet

c. Total deliveries (*add amounts in a and b above*)

0 acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use (*item b above*). Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 2000.

0 acre-feet

e. Total effluent deliveries (*not included in GPCD or lost water calculations*)

0 acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used (from Part V of the Annual Report Summary Page): _____ acre-feet

b) Total metered and unmetered (estimated) deliveries (Part 1c above): _____  acre-feet

c) Lost and unaccounted for water (subtract Part 2b from 2a above): _____  acre-feet

d) Percent of lost and unaccounted for water:

$$\frac{\text{lost and unaccounted for water (Part 2c)}}{\text{total used (Part 2a)}} \text{ AF} \div \text{AF} \times 100 = \text{Percent}$$

 AF ÷ _____ AF x 100 =  Percent

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) " Single family housing unit means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units (*not service connections*) in your service area between July 1, 1999 and July 1, 2000:

_____  units

b) " Multifamily housing unit means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units (*not service connections*) in your service area between July 1, 1999 and July 1, 2000:

ARIZONA DEPARTMENT OF WATER RESOURCES

2000 SERVICE AREA MAP UPDATE

Provider Number: 56-000354.0000

Provider Name: EVERGREEN AIR CENTER

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 2000, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 2000, indicate this below and submit two copies of your revised service area map with your 2000 Annual Water withdrawal and Use Report no later than March 31, 2001. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.
5. Each map must be dated and signed by an authorized representative.

Service area boundaries and operating distribution system have not changed since January 1, 2000.

____ Service area boundaries or operating distribution system have changed since January 1, 2000. (Two copies of the revised map must be submitted with your annual report.)

ARIZONA DEPARTMENT OF WATER RESOURCES
2000 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000354.0000
PROVIDER NAME: EVERGREEN AIR CENTER
CONTACT PERSON: ROBERT MELLENDEZ
PHONE NUMBER: 682-4181 - EXT 5852

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. Please contact the Tucson AMA at 770-3800 if assistance is needed.

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered (*both metered and unmetered*) to each of the following user groups for calendar year 2000.

a. Residential - include all uses of water related to service of residences (*housing units*) including both interior and exterior water use. This should include deliveries to multi-family housing complexes that are on master meters and deliveries to individually metered single family residences.

Metered 0 acre-feet
Unmetered 0 acre-feet
Total 0 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities (*item d below*). Do not include effluent or deliveries to irrigation rights or other service area rights.

Metered 0 acre-feet
Unmetered 0 acre-feet
Total 0 acre-feet

c. Total deliveries (*add amounts in a and b above*) 0 acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use (*item b above*). Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 2000.

0 acre-feet

e. Total effluent deliveries (*not included in GPCD or lost water calculations*) 0 acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

2000 Schedule F-1, Page 2

Right #: 56-000354.0000

Provider Name: EVERGREEN AIR CENTER

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used (from Part V of the Annual Report Summary Page): _____ acre-feet

b) Total metered and unmetered (estimated) deliveries (Part 1c above): 0 acre-feet

c) Lost and unaccounted for water (subtract Part 2b from 2a above): 0 acre-feet

d) Percent of lost and unaccounted for water:

0 AF ÷ 0 AF x 100 = 0 Percent
lost and unaccounted for water (Part 2c) total used (Part 2a)

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) "Single family housing unit means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units (not service connections) in your service area between July 1, 1999 and July 1, 2000:

0 units

b) "Multifamily housing unit means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units (not service connections) in your service area between July 1, 1999 and July 1, 2000:

0 units

ARIZONA DEPARTMENT OF WATER RESOURCES

2000 SERVICE AREA MAP UPDATE

Provider Number: 56-000354.0000

Provider Name: EVERGREEN AIR CENTER

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 2000, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 2000, indicate this below and submit two copies of your revised service area map with your 2000 Annual Water withdrawal and Use Report no later than March 31, 2001. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.
5. Each map must be dated and signed by an authorized representative.

☒ Service area boundaries and operating distribution system have not changed since January 1, 2000.

☐ Service area boundaries or operating distribution system have changed since January 1, 2000. (Two copies of the revised map must be submitted with your annual report.)

Mail or hand deliver this report, together with the appropriate schedules, worksheets and fees to the Arizona Department of Water Resources. If mailed, the report must be postmarked no later than March 31, 2000. If hand delivered, the report must be received by the Department's Records Management Unit or local AMA office no later than 5:00 PM on March 31, 2000.

THIS REPORT MUST BE FILED EVEN IF NO WATER WAS USED PURSUANT TO THIS RIGHT.

REPORTS FILED AFTER MARCH 31, 2000 ARE SUBJECT TO LATE FEES (ARS § 45-632) AND PAYMENT OF PREVIOUSLY WAIVED MONETARY PENALTIES ASSOCIATED WITH PRIOR GROUNDWATER CODE VIOLATIONS.

I hereby certify, under penalty of perjury, that the information contained in this report is, to the best of my knowledge and belief, true, correct and complete.

ARIZONA DEPARTMENT OF WATER RESOURCES
1999 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000354.0000
PROVIDER NAME: EVERGREEN AIR CENTER
CONTACT PERSON: Robert Denai's
PHONE NUMBER: 682-4181 EX. 5702

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. Please contact the Tucson AMA at 770-3800 if assistance is needed.

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered (both metered and unmetered) to each of the following user groups for 1999.

a. Residential - include all uses of water related to service of residences (*housing units*) including both interior and exterior water use. This should include deliveries to multi-family housing complexes that are on master meters and deliveries to individually metered single family residences.

Metered 0 acre-feet
Unmetered 0 acre-feet

Total 0 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities (*item d below*). Do not include effluent or deliveries to irrigation rights or other service area rights.

Metered 0 acre-feet
Unmetered 0 acre-feet

Total 0 acre-feet

c. Total deliveries (*add amounts in a and b above*)

0 acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use (*item b above*). Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 1998.

0 acre-feet

e. Total effluent deliveries (*not included in GPCD or lost water calculations*)

0 acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

1999 Schedule F-1, Page 2

Right #: 56-000354.0000

Provider Name: EVERGREEN AIR CENTER

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used (from Part V of the Annual Report Summary Page): 67.82 acre-feet

b) Total metered and unmetered (estimated) deliveries (Part 1c above): 0 acre-feet

c) Lost and unaccounted for water (subtract Part 2b from 2a above): 0 acre-feet

d) Percent of lost and unaccounted for water:

0 AF ÷ 67.82 AF x 100 = 0 Percent
lost and unaccounted for water (Part 2c) total used (Part 2a)

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) "Single family housing unit" means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units (*not service connections*) in your service area between July 1, 1998 and July 1, 1999:

0 units

b) "Multifamily housing unit" means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units (*not service connections*) in your service area between July 1, 1998 and July 1, 1999:

0 units

ARIZONA DEPARTMENT OF WATER RESOURCES

1999 SERVICE AREA MAP UPDATE

Provider Name: EVERGREEN AIR CENTER

Provider Number: 56-000354.0000

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1999, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1999, indicate this below and submit two copies of your revised service area map with your 1999 Annual Water Withdrawal and Use Report no later than March 31, 2000. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.
5. Each map must be dated and signed by an authorized representative.

☒ Service area boundaries and operating distribution system have not changed since January 1, 1999.

☐ Service area boundaries or operating distribution system have changed since January 1, 1999. (Two copies of the revised map must be submitted with your annual report.)

EVERGREEN AIR CENTER

C/O DAVID FOWLER

PINAL AIR PARK

MARANA, AZ 85653

Dear Small Municipal Provider:

This is an OFFICIAL NOTICE that the director of the Arizona Department of Water Resources (director) has issued a final order adopting the management plan for the Tucson Active Management Area (AMA) for the third management period, 2000 to 2010 (TMP). This is also an Official Notice of the conservation requirements, distribution system requirements and monitoring and reporting requirements established in the TMP for small municipal providers, which will become effective on January 1, 2002. **PLEASE CAREFULLY REVIEW THIS NOTICE AND THE ENCLOSED REQUIREMENTS.**

On December 13, 1999, the director issued a final order adopting the TMP. The TMP was adopted in accordance with Arizona's Groundwater Code, which requires the director to establish a continuing mandatory conservation program for all persons withdrawing, distributing or using groundwater within the AMA. For small municipal providers, the Groundwater Code requires the director to establish reasonable conservation requirements. The Code also requires the director to establish conservation measures as may be appropriate for individual users and economically reasonable conservation requirements for the distribution of groundwater by cities, towns, private water companies, and irrigation districts within their service areas.

As required by the Groundwater Code, the TMP contains reasonable conservation requirements for small municipal providers (TMP, section 5-110). The TMP also contains individual user conservation requirements for municipal providers (TMP, section 5-111), distribution system conservation requirements for municipal providers (TMP, section 5-112) and monitoring and reporting requirements for municipal providers (TMP, section 5-113).

As a municipal provider serving 250 acre-feet or less of water for non-irrigation use during a calendar year, you are a small municipal provider. Beginning on January 1, 2002, and continuing until the first compliance date for any substitute requirements in the Fourth Management Plan, you shall comply with the conservation requirements for small municipal providers in section 5-110 of the TMP, the individual user requirements in section 5-111 of the TMP, the distribution system conservation requirements for small municipal providers in section 5-112(2) of the TMP and the applicable monitoring and reporting requirements in section 5-113 of the TMP.

You should be aware that if you begin serving more than 250 acre-feet of water per year for non-irrigation use during the third management period, you will become a large municipal provider. In that event, you will be required to comply with the conservation requirements for new large municipal providers and the distribution system requirements for large municipal providers in the TMP beginning with the second full calendar year after you are given written notice of those requirements by the director.

Attachment A sets forth the conservation requirements and monitoring and reporting requirements established in the TMP for small and large municipal providers. Attachment A is incorporated into this notice by reference.

You have the right to seek administrative relief from the conservation requirements established in the TMP. You also have the right to seek judicial review of the director's order adopting the TMP. The following is a description of your rights.

Administrative Relief

The director has found the conservation requirements in the TMP to be equitable for most water users. However, there are two separate methods for seeking administrative relief from the conservation requirements if you believe you will be unable to comply with the requirements. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

A person who requires additional time to comply with a conservation requirement or distribution system requirement may apply to the director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The director may grant a variance for up to five years upon a showing of "compelling economic circumstances." An application for a variance must be filed within 90 days after the date you receive this notice.

2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement or distribution system requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575(A). An application for administrative review under A.R.S. § 45-575(A) must be filed within 90 days after the date you receive this notice.

An administrative review may also be applied for at any time during the third management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement. If these circumstances should arise during the third management period, please contact the Tucson AMA for information and application procedures.

Judicial Review

In addition to seeking administrative relief through a request for variance or administrative review, you may seek judicial review of the director's order adopting the TMP pursuant to A.R.S. § 45-114(C). Any action for judicial review must be filed within thirty-five days after your receipt of this notice. You may review the entire TMP at the locations listed in Attachment B.

If you have any questions regarding your conservation requirements or if you need an application form and information on the Variance or Administrative Review procedures, please call the Tucson AMA at (520) 770-3800.

Sincerely,

A handwritten signature in black ink, appearing to read "Rita P. Pearson". The signature is fluid and cursive, with the first name "Rita" being more prominent.

ARIZONA DEPARTMENT OF WATER RESOURCES

1998 SERVICE AREA MAP UPDATE

Provider Name: _____

Provider Number: _____

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1998, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1998, indicate this below and submit two copies of your revised service area map with your 1998 Annual Water withdrawal and Use Report no later than March 31, 1999. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.
5. Each map must be dated and signed by an authorized representative.

☒ Service area boundaries and operating distribution system have not changed since January 1, 1998.

☐ Service area boundaries or operating distribution system have changed since January 1, 1998. (Two copies of the revised map must be submitted with your annual report.)

****PLEASE ENCLOSE THIS SHEET WITH YOUR ANNUAL REPORT****

ARIZONA DEPARTMENT OF WATER RESOURCES
1998 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000
PROVIDER NAME: _____
CONTACT PERSON: _____
PHONE NUMBER: _____

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. Please contact the Tucson AMA at 770-3800 if assistance is needed.

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered (*both metered and unmetered*) to each of the following user groups for 1998.

a. Residential - include all uses of water related to service of residences (*housing units*) including both interior and exterior water use. This should include deliveries to multi-family housing complexes through master meters.

Metered 0 acre-feet
Unmetered 0 acre-feet

Total 0 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities (*item d below*). Do not include effluent or deliveries to irrigation rights or other service area rights.

Metered 0 acre-feet
Unmetered 0 acre-feet

Total 0 acre-feet

c. Total deliveries (*add amounts in a and b above*)

0 acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use (*item b above*). Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 1998.

0 acre-feet

e. Total effluent deliveries (*not included in GPCD or lost water calculations*)

0 acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

1998 Schedule F-1, Page 2

Right #56-000

Provider Name: _____

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used (from Part V of the Annual Report Provider Summary): 162.90 acre-feet

b) Total metered and unmetered deliveries (Part 1c above): Ø acre-feet

c) Lost and unaccounted for water (subtract Part 2b from 2a above): Ø acre-feet

d) Percent of lost and unaccounted for water:

Ø AF ÷ 162.90 AF x 100 = Ø Percent
lost and unaccounted total used
for water (Part 2c) (Part 2a)

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) "Single family housing unit" means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units (not service connections) in your service area between July 1, 1997 and July 1, 1998:

Ø units

b) "Multifamily housing unit" means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units (not service connections) in your service area between July 1, 1997 and July 1, 1998:

Ø units

ARIZONA DEPARTMENT OF WATER RESOURCES

1997 SERVICE AREA MAP UPDATE

Provider Name: EVERETT AIR CENTER

Provider Number: 11-034

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1997, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1997, indicate this below and submit two copies of your revised service area map with your 1997 Annual Water withdrawal and Use Report no later than March 31, 1997. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.
5. Each map must be dated and signed by an authorized representative.

☒ Service area boundaries and operating distribution system have not changed since January 1, 1997.

☐ Service area boundaries or operating distribution system have changed since January 1, 1997. (Two copies of the revised map must be submitted with your annual report.)

ARIZONA DEPARTMENT OF WATER RESOURCES

1996 SERVICE AREA MAP UPDATE

Provider Name: _____

Provider Number: _____

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1996, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1996, indicate this below and submit two copies of your revised service area map with your 1996 Annual Water withdrawal and Use Report no later than March 31, 1997. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.
5. Each map must be dated and signed by an authorized representative.

☒ Service area boundaries and operating distribution system have not changed since January 1, 1996.

☐ Service area boundaries or operating distribution system have changed since January 1, 1996. (Two copies of the revised map must be submitted with your annual report.)

OPERATIONS DIV.

ARIZONA DEPARTMENT OF WATER RESOURCES

1994 SERVICE AREA MAP UPDATE

Provider Name: EVERGREEN ARI CENTERProvider Number: 56-000 354.0000

According to A.R.S. § 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1994, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1994, indicate this below and submit two copies of your revised service area map with your 1994 Annual Water Withdrawal and Use Report no later than March 31, 1995. A duplicate copy of the service area map submitted to the Department shall be kept on file at your offices.

Maps must be drawn at a scale of 1:31,680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the townships and ranges covered by the map. Within the body of the map indicate the sections covered by the map.
5. Each map must be signed and dated by an authorized representative.

☒ Service area boundaries and operating distribution system have not changed since January 1, 1994.

☐ Service area boundaries or operating distribution system have changed since January 1, 1994. (Two copies of the revised map must be submitted with your annual report.)

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

MEASURING DEVICE MALFUNCTION

ENTER TOTAL ACRE-FEET OF
GROUNDWATER WITHDRAWN IN PART I
ON SUMMARY PAGE

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

READ INSTRUCTIONS CAREFULLY

1. Enter DWR Well Registration No. & Location.
DWR WELL REGISTRATION NO. 55-617486 (41) LOCATION NW NW SW 34 10S 10E
2. Enter type, make & model of measuring device used to measure flow. If measuring device is permanent, enter date installed or last overhauled.
TYPE OF MEASURING DEVICE
MODEL MC CRAMETER SIZE MC CRAMETER
UNITS MEASURED gallons INSTALLATION OR OVERHAUL DATE 8/83
3. Enter Power Co. Name, Account No., Meter No. and total energy consumption. Indicate units as KWH, therms or other measurement.
POWER CO. NAME not metered ACCOUNT NO. not metered POWER METER NO. not metered
ENTER TOTAL ENERGY CONSUMPTION IN COLUMN 6 OF SCHEDULE A
ENERGY CONSUMPTION not metered UNITS not metered
4. Does Energy Meter serve uses other than the well pump? ☒ YES ☐ NO
Enter "Y" or "N" in column 7 of Schedule A
5. Enter water reading as of January 1, in (5). If your meter reads in 10s, 100s, or 1000s of units, be sure to add the correct number of zeros.
6. Enter ending reading as of December 31, in (6). If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in (5) from reading in (6) and enter the difference in (7).

| WATER TOTALIZING METER READINGS | | |
|---------------------------------|------------|----------------|
| (5) INITIAL | (6) ENDING | (7) DIFFERENCE |
| 80,056,800 | 97,685,400 | 17,628,600 |

If meter was replaced during the year, indicate beginning and ending reading for each meter.

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion.

If meter reads in gallons, divide (7) by 325,851 and enter the result below.

If meter reads in cubic feet, divide (7) by 43,560 and enter the result below.

If meter reads in acre-feet, no conversion is necessary.

| | |
|-----------|------|
| ACRE FEET | 54.1 |
|-----------|------|

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period, as indicated on Meter Malfunction report.

| | |
|--------------------|---|
| BREAKDOWN ESTIMATE | — |
|--------------------|---|

10. Add (8) and (9) and enter result below and in column 4 of Schedule A for each well measured.

| | |

Mail or hand deliver this report together with the appropriate schedules, worksheets and fees to the Arizona Department of Water Resources. If mailed, the report must be postmarked no later than March 31, 1991. If hand delivered, the report must be received by the Department's Operation Division or local AMA office no later than 5:00 PM on March 31, 1991.

This report must be filed even if no water was used on this right.

REPORTS FILED AFTER MARCH 31, 1991 ARE SUBJECT TO LATE FEES AND PAYMENT OF PREVIOUSLY WAIVED MONETARY PENALTIES ASSOCIATED WITH PRIOR GROUNDWATER CODE VIOLATIONS. (ARS §45-632K)

I hereby certify, under penalty of perjury, that the information contained in this report is, to the best of my knowledge and belief, true, correct and complete.

REPORT OF GROUNDWATER WITHDRAWALS

ARIZONA DEPT. OF
WATER RESOURCES
DWR-AB 2-89

Enter groundwater right number and owner name, if not already shown, in **(1)**
 Enter DWR well registration number and location of each well, if not already shown, in **(2)**
 Enter power company name, account number and meter number, if not already shown, in **(3)**
 Enter total acre-feet of groundwater withdrawn for each well as calculated on attached worksheet, in **(4)**
 Enter grand total acre-feet withdrawn in **(10)** and in Part I of the Summary Page
 Enter device type used to measure withdrawals, if not already shown, in **(5)** (see list below).
 Enter energy consumed by well and units of measure from appropriate worksheet in **(6)**
 If energy meter serves uses other than the well, indicate "Y" in **(7)** if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in **(7)**
 If device types 2 through 6 are used, indicate the average discharge and divisor or total hours from the appropriate worksheet in **(8)** and **(9)**

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

[illegible]

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12- 15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)

3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)

4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)

6. Pumpage calculated using hour meters (use worksheet W-6)

[illegible]

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

| | Q | Q | Q | Sec | Trin |
| WELL # I 55-617486 | NW | UN | SW | 34 | 105 100 |

2. Enter type, make & model of measuring device used to measure flow. If measuring device is permanent, enter date installed or last overhauled.

| | |
|--------------------------|-------------------------------|
| TYPE OF MEASURING DEVICE | MAKE |
| MANULINE Recorder | MC PROMETER |
| MODEL | SIZE |
| MW 508 | 100-1500 GPM 8" dia. |
| UNITS MEASURED | INSTALLATION OR OVERHAUL DATE |
| GPM | 14 Nov. 83 |

3. Enter Power Co. Name, Account No., Meter No. and total energy consumption. Indicate units as KWH, therms or other measurement

| | | |
|--|-------------|-----------------|
| POWER CO. NAME | ACCOUNT NO. | POWER METER NO. |
| WELL NOT | METERED | |
| ENTER TOTAL ENERGY CONSUMPTION IN COLUMN 6 OF SCHEDULE A | | UNITS |

4. Does Energy Meter serve uses other than the well pump?
- ☐
- YES
- ☒
- NO
-
- Enter "Y" or "N" in column 7 of Schedule A

5. Enter water reading as of January 1, in (5). If your meter reads in 10s, 100s, or 1000s of units, be sure to add the correct number of zeros.

6. Enter ending reading as of December 31, in (6). If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.

7. Subtract reading in (5) from reading in (6) and enter the difference in (7).

| WATER TOTALIZING METER READINGS | | |
|---------------------------------|------------|----------------|
| (5) INITIAL | (6) ENDING | (7) DIFFERENCE |
| 97685400 | 119903900 | 22,218,500 |

If meter was replaced during the year, indicate beginning and ending reading for each meter.

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion.

- If meter reads in gallons, divide (7) by 325,851 and enter the result below.

- If meter reads in cubic feet, divide (7) by 43,560 and enter the result below.

- If meter reads in acre-feet, no conversion is necessary.

| | |
|-----------|------|
| ACRE FEET | 68.2 |
|-----------|------|

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period, as indicated on Meter Malfunction report.

| | |
|--------------------|------|
| BREAKDOWN ESTIMATE | None |
|--------------------|------|

10. Add (8) and (9) and enter result below and in column 4 of Schedule A for each well measured.

| | |
|--------------------|------|
| TOTAL IN ACRE-FEET | 68.2 |
|--------------------|------|

1. INTRODUCTION

The purpose of this study is to investigate the effect of the use of a mobile learning application on the learning outcomes of students in the field of computer science. The study is conducted in a classroom setting where students are using the application to learn about the basics of computer science. The application is designed to provide interactive learning experiences and to track the progress of each student. The study aims to determine whether the use of the application leads to improved learning outcomes compared to traditional classroom methods. The study is organized as follows: Section 2 discusses the background and motivation for the study. Section 3 describes the methodology used in the study. Section 4 presents the results of the study. Section 5 discusses the conclusions and future work.

2. BACKGROUND AND MOTIVATION

Computer science is a rapidly growing field that is essential for many industries. However, learning computer science can be challenging for many students. Traditional classroom methods often rely on lectures and textbooks, which may not be engaging or effective for all students. Mobile learning applications provide a more interactive and personalized learning experience. These applications can adapt to the learning style of each student and provide immediate feedback. This study is motivated by the need to improve the learning outcomes of students in the field of computer science. The study aims to determine whether the use of a mobile learning application can lead to improved learning outcomes compared to traditional classroom methods.

3. METHODOLOGY

The study is conducted in a classroom setting where students are using the application to learn about the basics of computer science. The application is designed to provide interactive learning experiences and to track the progress of each student. The study is organized into two groups: a control group and an experimental group. The control group uses traditional classroom methods, while the experimental group uses the mobile learning application. The study is conducted over a period of eight weeks. The learning outcomes are measured using a series of tests and quizzes. The data is analyzed using statistical methods to determine whether there is a significant difference in learning outcomes between the two groups.

4. RESULTS

The results of the study show that the use of the mobile learning application leads to improved learning outcomes compared to traditional classroom methods. The experimental group scored significantly higher on the tests and quizzes than the control group. This suggests that the application is effective in improving the learning outcomes of students in the field of computer science. The study also found that the application was well-received by the students, who found it to be engaging and easy to use.

5. CONCLUSIONS AND FUTURE WORK

The study concludes that the use of a mobile learning application can lead to improved learning outcomes for students in the field of computer science. The application provides a more interactive and personalized learning experience than traditional classroom methods. Future work should focus on developing more advanced mobile learning applications that can provide even more personalized learning experiences. The study also suggests that mobile learning applications could be used in other fields of study to improve learning outcomes.

Enter device type used to measure withdrawals if not already shown in 5 (see list below).

Enter energy consumed by well and units of measure from appropriate worksheet in (a)

If an energy meter serves other than the well indicate "Y" in ⑦. If an energy meter does not serve other energy combined by well and units of measurement from appropriate instrument, ⑦.

other uses (meter is dedicated to the wall) indicate "N" in 7

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from which meter is dedicated to the work indicated in (7).

the copyright worksheet in ⑥ and ⑦

1. Pumpage measured by meter or other totalizer/recorder devices. (use worksheet W-1)
2. Pipeline with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeline with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

ANNUAL WATER USE REPORT
SCHEDULE F-1
MUNICIPAL WATER PROVIDER REPORT

CALENDAR YEAR 1987

WATER PROVIDER NUMBER 56- 354

Provider Name:

Evergreen Air Center

Contact Person:

Ken Totter

Phone Number:

1-622-3671 ext 692

In addition to reporting withdrawals from service area wells, all municipal water providers are required to supply the following information for the 1987 calendar year. This information is required under provisions of the First Management Plan.

PART 1 - HOUSING UNITS SERVED

A housing unit is a group of rooms or a single room occupied as separate living quarters. A housing unit may be occupied by a family, a family and unrelated persons living together, two or more unrelated persons living together or by one person. Housing units include all single family, multi-family and patio homes. It does not include overnight or limited stay mobile home parks or campgrounds, motels, hotels or other temporary stay lodging facilities.

- a) "Single-family housing unit" means a detached dwelling. Mobile homes on separate lots that are not within a mobile home park are considered to be single-family housing units.

single family housing units added to water service area from July 1, 1986 to July 1, 1987: _____ units

- b) "Multi-family housing unit" means any housing unit located in a multi-family residential structure. Multi-family housing units are characterized by one or more common walls. Examples of multi-family residential structures include duplexes, triplexes, fourplexes, townhouses, condominiums and apartment complexes. Mobile homes in parks are considered to be multi-family housing units.

multi-family housing units added to water service area from July 1, 1986 to July 1, 1987. Indicate the number of housing units (not service connections):

Multi-family with individual meters _____ units
Multi-family with master meters _____ units

- c) total number of housing units within your water service area as of July 1, 1987:

Multi-family _____ units
Single family _____ units

*Any Questions on this sheet please
Call.*

PART 2 - DELIVERIES BY CATEGORY

Indicate the total quantity of water delivered in each of the following categories. Specify the amounts metered, unmetered and the total. Unmetered deliveries must be calculated using a generally accepted method of estimating water use.

- a) 1. residential - include all uses of water related to service of residences (housing units) including both interior and outdoor water uses:

metered _____ acre-feet
 unmetered _____ acre-feet total _____ acre-feet

2. non-residential, non-effluent deliveries (include deliveries to turf facilities):

metered _____ acre-feet
 unmetered _____ acre-feet total _____ acre-feet

3. non-effluent deliveries to other water rights (from Part II of the Summary Page):

metered _____ acre-feet
 unmetered _____ acre-feet total _____ acre-feet

- b) total non-effluent deliveries (add totals from a1, a2 and a3 above):

_____ acre-feet

- c) total effluent deliveries (include deliveries to turf facilities):

_____ acre-feet

NOTE: A "TURF RELATED FACILITIES REPORT" (SCHEDULE G-2) MUST BE COMPLETED FOR EACH TURF-RELATED FACILITY RECEIVING WATER FROM YOUR SYSTEM

PART 3 - LOST WATER AND UNACCOUNTED FOR WATER

- a) Calculate the quantity of lost and unaccounted as outlined below:

1. Indicate the total quantity of water withdrawn, diverted, or received (add Parts I and III of the Summary Page). Do not include effluent diverted: _____ acre-feet
2. Indicate total deliveries (from Part 2c above): _____ acre-feet
3. Calculate lost and unaccounted for water by subtracting total deliveries (step 2 above) from the amount withdrawn, diverted or received (step 1 above): _____ acre-feet

- b) Calculate the percentage of lost and unaccounted for water as follows:

$$\frac{\text{lost \& unaccounted for water (step 3)}}{\text{total quantity (step 1)}} \times 100 = \text{percent lost and unaccounted for water}$$

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location in (1).
2. Enter type, make, model, size, & units of measuring device used to measure flow in (2). If measuring device is permanent, enter date installed or last overhauled in (2).
3. Enter Power Co. Name, Acct. No., & Meter No. in (3).
4. Enter Initial Reading as of January 1 in (4).
5. Enter Ending Reading as of December 31 in (5) unless totalizer dial has rolled over. If totalizer has rolled over enter all 9's in (5).
6. Subtract reading in (4) from reading in (5) and enter difference in (6).
7. If totalizer has rolled over, enter Dec. 31 reading in (7).
8. If entry is made in (7), add (6) and (7) and enter total in (8).
9. Convert the Total Amount Pumped to acre-feet by using the appropriate conversion and enter result in (9).
10. If meter reads in acre-feet make no conversion.
 - If meter reads in gallons divide (9) by 325,851 and enter result in (9).
 - If meter reads in 1000 gallons divide (9) by 325.9 and enter result in (9).
 - If meter reads in cubic feet divide (9) by 43,560 and enter result in (9).
11. Add (9) and (10) and enter result in (11) and in Col. 4 of Schedule A for each well measured.

Dear Mr. Gessner:

I am in receipt of your June 25, 1985 letter to
Evergreen Air Center regarding overpayment.

We would like a check for the refund sent to my
attention at the above address.

Thank you.

Sincerely,

Priscilla L. Maynard
Secretary to the President
